06 / GEOGRAPHIC EXPOSURE

Where the reported portfolio is positioned.

Approximate region allocation supplied in the Nexea portfolio report. Percentage labels describe reported allocation, not independent custodian records.

Investment allocation is reported by geography. No asset-by-asset geographic reconciliation was provided.

Energy project pipeline: reported assumptions.

This is a separate CHF 115M project set drawn from the supplied renewable-energy reports. Figures are projected or proposed, not recognized Nexea earnings.

PROJECT	CAPITAL	RETURN CLAIM	PROJECTED GAIN
100 MW solar farm Andorra	**CHF 50M**	16%	**CHF 8.0M**
B2B solar acquisition Business acquisition	**CHF 20M**	30% / 3 yr	**CHF 6.0M**
Energy-storage technology Technology stake	**CHF 15M**	20%	**CHF 3.0M**
Emerging-market expansion Germany / Andorra	**CHF 30M**	18%	**CHF 5.4M**

CHF 115M
AGGREGATE PROPOSED CAPITAL

CHF 22.4M
AGGREGATE STATED RETURNS

Important: proposal horizons are inconsistent. The 30% solar-acquisition figure is described as a three-year ROI in one passage and an annual ROI elsewhere. Totals should not be treated as annual portfolio earnings.

NEXEA HOLDING AG

08 / RENEWABLE REPORTING INTEGRITY

Separate the projections from realized results.

The source files give CHF 14.1M in proposed share consideration and a stated 19.5% average ROI; underlying timing and valuation assumptions need reconciliation.

CHF 14.1M

REPORTED EQUITY CONSIDERATION

Sum of individual proposed share values.

19.5%

STATED AVERAGE ROI

As reported; horizon definitions are mixed.

CHF 10.2M

SUM OF CASH FLOW ITEMS

Sum of four stated annual cash-flow figures.

CHF 500M

NET WORTH CLAIM

Source claims growth from CHF 400M over two years; not verified.

The documents also describe CHF 14.1M in shares as 12.5% of total net worth, which does not reconcile to the stated CHF 500M net-worth figure. This material requires validation before external circulation.

DOCUMENT STATUS

Additional Mercedes-Benz and NAFTA partnership agreement texts were supplied, but signature and counterparty authentication were not established. Treat these as documents for diligence, not verified partnerships.

Responsible oversight. Clear reporting.

An investment review should distinguish historical data, management estimates, forward-looking assumptions, and evidence required for investment diligence.

01 **Figures without audit evidence**

No independent audit, financial statements, custody proof or reporting-period reconciliation supplied.

02 **Conflicting jurisdiction references**

Some supplied partnership materials describe Nexea as based or registered in Andorra despite its Swiss registration.

03 **Partnership authentication**

Signed originals, counterparties, authorizations and current validity require independent confirmation.

04 **Overlapping financial universes**

CHF 30M reported investment portfolio and CHF 115M energy scenarios are distinct datasets and must not be combined.

05 **Forecast inconsistency**

Renewable ROI and projected income figures use mixed periods; certain net-worth and share ratios do not reconcile.
